PROFESSIONAL WOOD COATINGS

for indoors and outdoors

Wood Paint Lignucolor

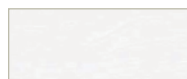

- Coloured, particularly durable water-based wood paint
- For outdoor use on all hardwoods and coniferous woods: Wooden cladding, soffits, shutters, balconies, railings, pergolas, sheds, carports, fences etc.
- Also ideally suitable for indoor use

- Semi-gloss – open-pored
- Weather resistant. Protects the wood from UV radiation and greying
- Excellent colour fastness
- Quick-drying

- 1 litre of Lignucolor wood paint is enough for approximately 10 m² / coat on sanded surfaces

Notice on colour shades:

The shades "Oak / Walnut / Hickory" are coloured transparent stains. The grain of the wood remains visible. All shades can be mixed with each other.

Wood Varnish

- Water-based wood varnish which accentuates the natural grain and structure of the wood
- For all hardwoods and coniferous woods outdoors:
Wooden cladding, soffits, shutters, balconies, railings, pergolas, sheds, carports, fences etc.
- Semi-gloss – open-pored
- Penetrates deep into the wooden surface
- Water-resistant – prevents the wood from absorbing excessive water
- 1 litre of wood varnish is enough for approximately 14 m² / coat on sanded surfaces

Wood Oil

- Special deep penetrating oil based on natural oils and resins
- Provides reliable protection for the wood and retains its natural beauty
- For all durable hardwoods, coniferous woods and tropical hardwoods
- Outdoors: Garden furniture, decking, garden woods, privacy fences, pergolas, carports etc.
- Semi-gloss – open-pored
- Colourless or tinted, specially matched to the respective shade of the woods
- Penetrates deep into the wood
- Water and dirt resistant
- 1 litre of wood oil is enough for approximately 15 m² / coat

Bangkirai-Teak 2269

Douglas - larch 2268

Pine, olive 2223

Spruce 2224

Clear 0000

Especially suitable for all high quality, dark woods such as bangkirai, teak and mahogany

Especially suitable for larch, douglas etc.

Specially matched to the original colour of pressure-impregnated pine and firs

For all light-coloured wood

Especially suitable for iroko, false acacia etc.

for interior use,
clear or
translucent colours

Wax-based Wood Varnish

- Water-based wood varnish that leaves the wood's natural grain visible
- For all hardwoods and coniferous woods indoors: Wood panels for walls and ceilings, beams, rails, shelves, skirting boards etc.
- Ideally suited for wooden furniture and children's toys

- Velvety surface
- Semi-gloss – open-pored
- Water and dirt resistant
- Resistant to standard domestic cleaners
- Suitable for wet rooms (e.g. for wood in the bathroom and kitchen)
- Quick-drying

- 1 litre of wax-based wood varnish is enough for approximately 14 m² / coat on sanded surfaces

PINUS

PINUS

for outdoor use

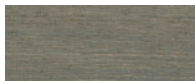

for wooden floors,
clear

Pre-patina varnish

- Water-dilutable, acrylic-based thin-coat glaze
- For solid wood profiles which are required to have a shade similar to the natural greying from the very beginning (e.g. cladding)
- Water-dilutable, odourless and open-pored, permeable to water vapour and breathable
- Particularly suitable for coating rough or fine-sawn wooden surfaces outdoors
- 1 litre of pre-patina varnish is enough for approximately 14 m² / coat on planed surfaces

Silver grey 1221

PINUS

Hard Wax Oil

- Clear natural oil and wax-based surface finishing
- For all stressed surfaces indoors:
Wooden floors, parquet, cork, OSB, staircases, worktops, shelves, window sills, skirting boards, glued wood, wooden furniture etc.
- Equally suited for hardwoods and coniferous woods
- Semi-gloss
- Provides wooden surfaces with lasting protection and care
- Special oil / wax – combination which penetrates deep into the wood
- The natural grain of the wood remains visible
- Resilient surface, water and dirt resistant (as per DIN 86 861 –1C)
- Low-maintenance
- 1 litre of hard wax oil is enough for approximately 13 m² / coat

PINUS

For all your precious wood ...

Wood – the most natural of all materials – is as convincing today as it ever was due to its fascinating aura, its excellent technical properties and its superb environmental balance.

In order to maintain these values over many years, wood requires reliable protection and adequate care.

PINUS wood coatings provide the perfect solution – for every application.

Years of development and experience mean that our products meet all the demands made of modern wood coatings today:

- **PINUS** wood coatings are open-pored and elastic. The wood remains breathable and maintains its moisture regulating quality.
- **PINUS** wood coatings are easy to process.
All coatings are developed as a "single-pot system".
- **PINUS** wood coatings are environmentally friendly products. During production we strictly avoid the use of heavy metals and formaldehyde.

Specially developed for woods for ...

... INDOOR USE

Whether for wooden wall and ceiling panels, wooden furniture, shelves, skirting boards, children's toys, floors etc.: **PINUS** wood coatings provide you with the most diverse range of design options. From colourless and transparent solutions to opaque colour shades – There are no limits on your creative ideas.

At the same time, your wood is provided with the day-to-day protection it needs. The treated wood is given a resilient surface and is both water and dirt resistant.

... OUTDOOR USE

Woods for outdoors, such as wooden cladding, balconies, sheds, garden furniture, fences, decking are exposed to extreme weather conditions. You should therefore take care not to make any compromises when it comes to quality.

By using **PINUS** wood coatings you will retain the wood's natural properties and give it lasting protection from wind, sun and rain. After all, all the wood around the home should remain beautiful and functional for many years to come.

You can use our current colour range to apply your own personal touch: Classical or modern, timelessly elegant or young and vibrant. Harmonious colours for your beautiful home.

PINUS wood coatings are available in tin sizes **0.75 l**, **2.5 l**, and **25 kg**.
